

OSA - 1845-64

19 May 1964

To: Contracting Officer  
Subject: PROPOSAL TO CONDUCT FEASIBILITY STUDY

Pursuant to discussions with Headquarters representatives this date, we propose to conduct a study to determine the feasibility for using a modified U-2L airplane to perform certain photographic work. Our study will include determination of operating parameters related to various flight profiles associated with this type of mission.

In addition to analysis of aircraft performance and aerodynamic characteristics, we will furnish the equipment manufacturers with optimum equipment characteristics for use in their design work. At the conclusion of the study, we will furnish a final report to summarize the results. We would expect to complete this effort by 31 August 1964.

Enclosed is a price breakdown to support our offer to do this work at a target price of [REDACTED] and a ceiling not to exceed [REDACTED]. Please advise if you have any further questions regarding this proposal or the proposed statement of work for this study which has been provided separately.

Very truly yours,

[REDACTED]
